Agency / Organization*

White House and Secret Service

Details*

I am a former precinct chair of the Texas Republican party, and I was noticed by the Presidential campaign of Donald Trump.

I am a licensed attorney at law that worked to investigate Texas' publicly disclosed voting results of the 2020 presidential election. I filed numerous public information requests and lawsuits against the eight largest counties in Texas. Some of the work that I completed resulted in Ken Paxton's issuance of the updated KP-0411 opinion relating to the disclosure of precinct election records. A copy of the opinion can be found here: <https://www.texasattorneygeneral.gov/sites/default/files/images/executive-management/kp-Ballot%20Opinion.pdf>

Around this same time, and shortly after this occurred, I began to notice digital interactions with my telephones and computers, as well as in-person interactions of people and vehicles that initially seemed to be 'protecting' me.

Soon after this began, and after the slightest of remarks to my wife (inside of our home) that would barely appear to register as a complaint about the performance of Donald Trump, our new car was boot kicked, and driven into while parked in two different parking spaces on two different occasions.

This initial interaction began around 2021-2022 and has continued to this present moment. The people around us that were once projecting an image of 'protecting us' or 'helping us' has turned to images of 'threatening us' and 'harming us.' I have filed numerous police reports about criminal activities against our home, including one in San Antonio, Texas on August 08, 2024 for an Assault with a Deadly Weapon.

On that day, a man with a gun appeared from off of the street to approach me in my front yard at 830am, and did fire that weapon at my feet. I have this interaction on surveillance camera video and immediately contacted the San Antonio Police Department. The response that I received from them was disappointing and did not instill confidence that my complaint would be investigated in any way.

Now, after years of spying into my life, I am still being monitored and I am being subjected to a 'KKK' style campaign of terrorism against my home by Donald Trump and his agents within the United States Secret Service. To be clear, this is an 'inside' job that is being pushed into our 'outside' world using criminal gangs that are being fed information about our whereabouts and the activities that are occurring within our home at all times.

Vehicles follow us around, people meet us at every location that we enter, and planes are being flown directly over and around our home in a remote area of the mountains in Spain. People have sprayed graffiti at the end of our driveway and left motorcycle tire marks immediately outside of the stairs to our home. I have reported this to the FBI and to the United States Secret Service as complaints of employee misconduct.

Donald Trump is using his access to American military spy technology to watch me inside of, and around, my home; to follow me everywhere that I go; and to attempt to interact with my life in a negative and threatening way while 'hiding behind the veil' of government agencies and technologies.

This intrusion into my life has been ongoing and is a substantial interference with my normal daily routine. The general effort seems to be to 'lead' me towards some sort of negative reaction or to 'lead' me to cause a disruption in my home and family life. This is a persistent and ongoing intrusion into our life and does include a physical presence near me at all times as well as a digital presence within my phone, computers, and iPad.

For example, these agents are manipulating my searches within the browser of my phone, are turning on my video camera, and are creating and sending text messages to contacts within my telephone. The general effort from these agents is apparently in the form of a Ku Klux Klan style terrorism into my daily life solely for the purpose of creating an ongoing reaction and threatening communication. 'Action, action, action' against me is occurring in a perpetual manner that is specifically designed to intrude into our homelife and normal daily interactions.

These efforts include a persistent use of the I-ching to provide 'sign language' messages using a number code and other images that I am working with at any given time. These efforts are an attempt to 'mirror' my daily work in these areas and are an attempt to disrupt my progress in completing my tasks and goals. The general messaging to me is designed to appear as being from an 'evil king' that is embodying biblical principles in the form of constant attacks of sinful behavior against my life.

I have already been 'driven' from my former home in San Antonio, Texas by an endless cycle of vehicles (large trucks, industrial equipment, and normal v-8 engines) that was 'parading' itself around my house from morning through to the night. I am describing a 'spiraling' effect of vehicles driving constantly around our block as if they are 'dogs' or other 'animals' circling a prey.

This has been a persistent effort to disrupt my daily routine and happiness. The problem was so severe in San Antonio, that my wife was unable to work in our home office. We were unable to focus, concentrate, or complete normal activities before we left. We left the city and are seeking political asylum from a remote location in Spain.

To the present moment, the problem is persisting against our home, but we have a larger space between us and the noise nuisance intrusions. This additional space has allowed us a minimal 'buffer zone' to slightly decrease the noise and to continue working from home while beginning to seek accountability of Donald Trump for his crimes.

against us.

I am writing this letter to alert your office to the seriousness of the circumstances and to bring your attention to the way and manner in which United States 'homeland' and 'international' security is being used to cause threats against, and actual harm to, normal American citizens both in America and, now, in another sovereign state altogether.

Thank you for your attention to this important matter.
